

EXPORT MANAUS

Following the Carriers announcement please be advised that SACO Shipping is implementing a rate Supplement of EUR 20,00 w/m for cargo bound for Manaus, effective immediately.

The rapid reduction of navigability in the Amazonas River has brought about severe limitations to steamship companies to service this specific market, causing a drastic increase in cost and hampering lines' transport capacity.

The drought already reduced the River's level down to 17,78 meters, at a pace of as much as -20 cm a day, representing a maximum draft of 9,70 meters for the next connecting vessel, worsening down to 9,40 meters in the next two weeks. Time being, vessels are forced to enter the Rio Negro river with less than 50% of their capacity. We will continuously monitor the situation to ensure servicing this market as safe and as effective as possible.

For any further assistance required, please do not hesitate to contact us any time. For sailing schedule Manaus please click [here](#)
