LCL Export Ivory Coast SGS Renovo Program

Dear valued customer,

we would like to inform you about a change in regulations for electrical and electronic equipment (EEE) and tyres imported into Ivory Coast.

- SGS will, through its affiliates throughout the world, carry out physical inspection and verification at the country of export of any used and waste electrical and electronic products.
- In addition, SGS will collect an advance eco levy on all electrical and electronic equipment and tyres exported to Ivory Coast, based on the “polluter pays principle”.
- Liability of compliance rests with the importer /exporter. Importers of EEE and tyres to Ivory Coast are responsible to inform their supplier/exporter of the mandatory nature of the program and of the requirement to register on the e-environmental platform deployed by SGS.
- No consignment will be cleared through Customs without an electronic environmental declaration form approval / clearance certificate
