Suez Canal impacts

Dear valueable customers,

The blockade of the Suez Canal from 23.03.-29.03.2021 will certainly have a negative impact on global supply chains and deteriorate todays already volatile market even further. We are expecting heavy delays in Im- and Exports and consequently possible blanc-sailings. How long the consequences will remain with all of us is not known at this time yet.

Additionally the delays of incoming vessels may add to the already existing equipment and allocation shortage.

SACO Shipping makes every effort to perform all our services as best as possible. For urgent cargoes to and from China please kindly get in contact with us for rail services or reach out to our airfreight experts from [SACO GROUPAIR](#).
